

Mineral sourcing policy

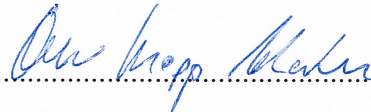

Conflict minerals.

Conflict minerals are tin, tantalum, tungsten, and gold (3TG) originated from conflict-affected and high-risk areas.

ASSO Produkter expect that products and components we receive from our suppliers are not deemed to be conflict minerals originated from DRC or are conflict free.

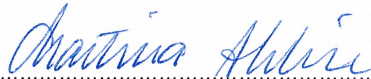

A supplier of relevant goods must be able to provide all necessary documentation for proofing its legitimate origins on request.

ASSO Produkter rely on information provided by our suppliers.
